The COVID-19 pandemic is impacting the movement of airfreight and courier mail in multiple countries. This has led some exporting country NPPOs to advise Australia that they are unable to provide original paper-based phytosanitary certificates with import consignments of a range of imported fresh produce, cut flowers, plants, plant products, and other regulated articles, as per our requirements. This temporary arrangement will be in place until 1 July 2020. Stakeholders will be notified of any extension to this arrangement closer to this date.

Criteria are listed in Article 4 of the Regulation (and also detailed in Annex II thereto) which must be met to enable approval. During the evaluation and peer-review of benalaxyl, a number of concerns and areas that could not be finalised were identified. These are detailed in the conclusion of the European Food Safety Authority (EFSA). In Particular, the Authority could not exclude the potential groundwater contamination by relevant metabolites and identified as a critical area of concern a long-term risk to birds and earthworm-eating birds from secondary poisoning from benalaxyl. Additionally, the Authority identified concerns in relation to the risk to in-field and off-field non-target arthropods for all representative uses. Finally, following the request by the Authority for additional information, the applicant confirmed that no additional studies would be performed or submitted. Consequently

sps 2020 - 26	G/SPS/N/AUS/501	03/07/2020	Australia	<p>Animal health; Plant protection; The objective of this policy is to promote safe trade under the impacts of COVID-19.</p> <p>The COVID-19 pandemic is impacting the movement of airfreight and courier mail globally. This has led some exporting country National Plant Protection Organisations and Veterinary Authorities to advise Australia that they are unable to provide original paper-based phytosanitary and health certificates with import consignments of a range of imported plant-based, animal, biological and animal-based goods.</p> <p>While international standards require exporting countries to issue original phytosanitary and health certificates, it is up to importing countries how they are processed. Australia's interim arrangements require the exporting country to provide a mechanism to verify copies if required by our inspecting officers.</p>
