This has led some exporting country National Plant Protection Organisations and Veterinary Authorities to advise Australia that they are unable to provide original paper-based phytosanitary and health certificates with import consignments of a range of imported plant-based, animal, biological and animal-based goods.</p> <p>While international standards require exporting countries to issue original phytosanitary and health certificates, it is up to importing countries how they are processed. Australia's interim arrangements require the exporting country to provide a mechanism to verify copies if required by our inspecting officers.;</p>
