sps 2022-3	G/SPS/N/CHE/85	20/01/2022	Switzerland	Food safety; On 6 May 2021, EFSA published an updated safety assessment for E 171. According to this, E 171 is no longer considered safe for use as a food additive. The EFSA safety assessment found that titanium dioxide is absorbed from the gastrointestinal tract to a very low extent, but takes a long time to be excreted from the body. In addition, titanium dioxide has the potential to accumulate in tissues. After evaluation of the available data, the suspicion of a mutagenic effect of titanium dioxide could not be invalidated. Based on this safety assessment, Switzerland decided that this additive should no longer be used in food .
